1. Applicant's election without traverse of Species II, claims 1-3,5,9-11,13 and 33-36, Figs. 5-7 in 2/2/2006 is acknowledged.

Claims 6-8,14-15 and 37-40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a non-elected species, there being no allowable generic or linking claim. Election was made **without traverse** in the reply filed on 2/2/2006.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3,5,9-11,13 and 33-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Dybbs (6,228,099).

Dybbs discloses a blade assembly that can be assembled into a microkeratome, including: a blade (98) has a cutting edge (102), a rear edge (see attached figure where all yellow mark is characterized as a rear edge), and a pair of side edges (occurs at either side of element 98), where a blade holder (96) that has a reference surface and is loaded into the inner cavity, and where the blade holder reference surface (106) is capable of pressing into and in contact with the rear edge of the blade and is capable of attaching the blade

holder to the blade, where the a blade holder has a slot that receives the pin (135), and where the rear edge has a plurality of fingers (occur at either side of element 102), and where the blade holder is coupled to the blade by a frictional fit, and where the blade can pivot relative to the blade holder, and where the blade holder also has an outer groove (fig.4).

Response to Arguments

3. Applicant's arguments filed 8/29/2005 and 2/2/2006 have been fully considered but are moot in view of new ground(s) of rejection. Applicant is asked to please refer to the modified prior art rejection above where examiner addresses applicant's concerns regarding prior art rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
